MarilynHickeyEncounterTheWord Full HD Online [www.Q: Javascript callback function to create
nested groupings I'm new to Javascript and can't figure out how to create this callback function.
I've looked at the GitHub page of Douglas Crockford which has no examples of what I'm trying to
achieve. Basically, I need to create groups of arbitrary numbers of rows using a callback. The goal
is to have no more than one value per group. The data source is from a CSV, and in each row
there's a name, number, and a description. The last name, number, and description will be used in
the callback. Here's what the data looks like: Name, Number, Description Ax1, 1, T1 Jack, 2, T2
Amy, 3, T3 Fred, 1, T4 Sam, 3, T5 This is my callback function. It's also currently returning three
names (Ax1, Jack, and Amy), three numbers (1, 2, and 3), and three descriptions (T1, T2, and T3).
function createGroups(line){ var values = line.split(",") return { Name: values[0], Numbers:
values[3e33713323
