First released in 1982, AutoCAD is regarded as one of the top-ranked CAD programs in the world. The software enables the creation of a variety of models and drawings, such as architecture, engineering, building, and mechanical plans. Autodesk has recently developed other software products, such as AutoCAD 360, for AutoCAD users who require virtual reality experiences; Autodesk 360 3D; for Autodesk 360 users who want a fully integrated, unified suite of technology for architecture, engineering, and construction; Autodesk 360 Revit; for users who want to combine the best of AutoCAD with the best of Revit; and Autodesk 3ds Max; for 3D content creators. Model Repository Autodesk Revit, Autodesk 3ds Max, Autodesk Inventor, Autodesk Inventor Viewer, and Autodesk 3ds Max Viewer allow importing and exporting information from one application to another. The File Exchange Project was shut down as a service in 2011. Raster to vector conversion Autodesk Inventor allows exporting and importing of vector-based drawings in DWG and DXF formats. AutoCAD does not support this. Autodesk Vault is a raster to vector conversion application created by Autodesk, Inc. that enables

users to convert raster images to vector drawing formats, including DWG, DXF and PDF. AutoLISP support AutoCAD supports a large number of AutoLISP files, including user code that can be entered by the user or installed by Autodesk; for example, it can perform automatic reselection of objects or open a drawing for editing. AutoCAD's AIXE (AutoCAD's Automation Interface eXtension) is a set of library files that includes the ability to run AutoLISP code and extend AutoCAD's built-in user interface.

Visual LISP support The version of AutoCAD on the Mac OS X operating system was officially discontinued in the 2010 release, but many users still use it to create simple macros and 3D model files. The development of this version of AutoCAD was handed over to the Open Design Alliance (ODA), a company working to develop AutoCAD as a web app. Open Design Alliance's AutoCAD for MacOS is based on AutoLISP.

VBA support Visual Basic for Applications (VBA) is a macro language for Microsoft Office (Word, Excel, etc.). VBA is built in and can be added to AutoCAD as an add-on.

ObjectARX support ObjectARX was Autodesk's .NET library. It is now discontinued.
